

MetricsPlus™

Work Smarter with Premier Analytics & Consulting

MetricsPlus will help your company increase collections, reduce costs, and help aid in strategic data driven business decisions. It does this by focusing on four key areas: Data Enrichment, Account Segmentation, Reporting, and Consulting.

You'll have a team of consultants assigned to your company to help you understand your data and assure your success.

APPLIED DATA INTELLIGENCE WITH INTELITECH

About Intelitech

The Intelitech Group has been a premiere analytics and consulting provider in the ARM industry for over 20 years. Our work has empowered hundreds of organizations to work smarter using operational consulting, machine learning, and actionable data. We optimize work efforts, improve consumer reach, and avoid risk while evaluating and benchmarking performance.

Consulting

We not only provide the right information but help you use it effectively. Some benefits from consulting are:

- An assigned analyst focused on your business
- Ongoing training
- A direct communication line

Account Segmentation

We'll help you segment your inventory properly by placing focus on the accounts that are most valuable to your organization. This will help you:

- Improve consumer reach
- Focus on profitable accounts
- Improve productivity

"We've definitely seen revenue increases while using Intelitech services, and I think it's a combination of higher listings and the ability to focus on the right listings as they come in."

Tammy Keener | VP of Operations
Credit Service Company

Data Enrichment

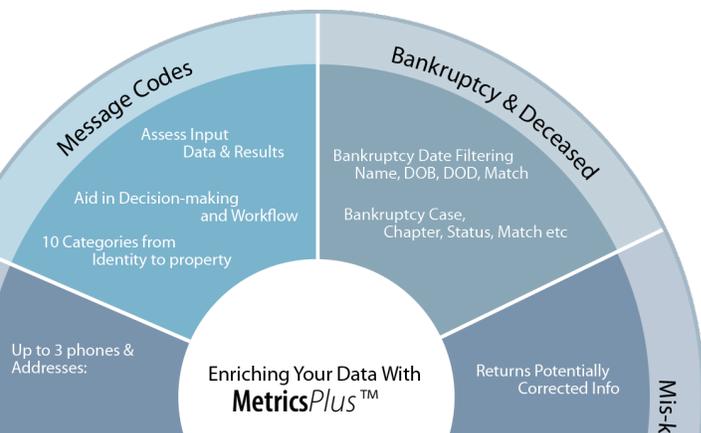

We activate your data so it does the work for you. Smarter data means you can:

- Improve contact ability with up to 3 phone numbers and addresses per account
- Minimize lawsuits with a bankruptcy and litigious scrub

Reporting

We provide dozens of standard and custom reports tailored to your business needs. With reporting you can actually use, you can:

- Evaluate performance through trend analysis
- Evaluate your business processes
- Assist with everyday decision making
- Identify risk situations
