

# Ultimate<sup>®</sup> Analytics

## Work Smarter with Premier Analytics & Consulting

Ultimate Analytics will help your company increase collections, reduce costs, and aid in strategic data driven business decisions. It does this by focusing on five key areas: Data enrichment, Account segmentation, Workflow automation, Insightful reporting, and Engaged consulting.

You'll have a team of consultants assigned to your company to help you understand your data and assure your success.

### APPLIED DATA INTELLIGENCE WITH INTELITECH

### About Intelitech

The Intelitech Group has been a premiere analytics and consulting provider in the ARM industry for over 20 years. Our work has empowered hundreds of organizations to work smarter using operational consulting, machine learning, and actionable data. We optimize work efforts, improve consumer reach, and avoid risk while evaluating and benchmarking performance.

## Consulting

We not only provide the right information but help you use it effectively. Some benefits from consulting are:

- An assigned analyst focused on your business
- Ongoing training
- A direct communication line

## Workflow Automation

There are a number of ways we improve your workflow, some of those ways are through:

- Work strategies
- Account Lifecycle intelligence
- Automation with message codes & scripting

## Data Enrichment

We activate your data so it does the work for you. Smarter data means you can:

- Improve contact ability with up to 3 phone numbers and addresses per account
- Minimize lawsuits with a bankruptcy and litigious scrub

## Account Segmentation

We'll help you segment your inventory properly by placing focus on the accounts that are most valuable to your organization. This will help you:

- Improve consumer reach
- Focus on profitable accounts
- Improve productivity

*"We have seen recognizable improvement in our collection procedures and strategies. There is no question about the positive impact The Intelitech Group has had on our collection efforts and our account flow."*

**Lacey Cherrington** | VP & GM  
The Cherrington Firm

## Reporting

We provide dozens of standard and custom reports tailored to your business needs. With reporting you can actually use, you can:

- Evaluate performance through trend analysis
- Evaluate your business processes
- Assist with everyday decision making
- Identify risk situations
